Pros:

The storyline is nice.

Different modes during the game ex. travel mode is like a board game.

Characters can learn different skills

Cons:

The gameplay is a bit weak.

Clipping and camera angles make take away from your ability to fully immerse yourself in the game. It makes the game unplayable at times.

These are from personal preference:

Your party maxes out at 4 members in fight mode.

Your characters have a level cap of 10.

Only 1 equipment slot.

Character progression skills are extremely limited.. This game started out strong but went downhill fast. I really wanted to like it but currently it has too many flaws for me to enjoy it. I'll list the pros and cons as it's easier.

Pros :

- Nice layout

- Interesting backgrounds with lots of detail (though it bothered me that it differs in artstyle compared to the character sprite)

- I had a few good laughs at the beginning because some scene's were genuinely funny

Cons :

- The MC. In most games it's a negative when the mc you play as is bland and has no personality. This one has too much personality. To the point where I disliked playing as them. They are way too stubborn, takes way too long to warm up to the beta boyfriend and overall just not a nice person. Neither did I care for their personal problems which took up a large portion of the story. If only we were able to change the mc's personality too.

- What's up with all the millennial jokes? I didn't get them

- The voice-acting was bad and the thing being said is never the same as the written text.

- I've played the game about 10 times now (skipping through everything after my first attempt) and got stuck with the base boyfriend ending every single time. Which is really frustrating! Since I don't know what determines the boyfriend to change I'm stuck until a guide for this comes out so I can't even finish the game fully.

I had high hopes for this game but it let me down. It's basically a bad game version of a manga called 'Absolute boyfriend'. I'll update my review once guides are available and I've seen more of the game.. Very good, indy game that feels like a 3d take on old classics. I has very simple game mechanics but has a unique feel to it. Needless to say, I highly recommend it, especially considering it will only get better with time since it's early access.

As a side note, as I was playing it my kids came over and insisted on playing, and now it's one of their favorite games. It's probably a little violent for them but since there isn't any blood I don't think there's much harm in it.. Nice job, however I would have liked paints for any ship that you own.. if you like mario 64 then you'll probably like this. Be sure to give Rorona headpats.. It's not much, but it's a fun little game for what it is. Will keep you busy for 2 hours if you're into it.

Warning: Lots of button mashing and infuriating hit-stun.. I would like to say this was a shocker at first for many reasons

1. this was not easy to start to play game there was two problems with getting it to run on a new system and once running then mouse pointer was hidden then the config screen was messed so could not fix it.

so yes there are issues and if you don't know how to fix and find them steam community forums then don't buy it.

2. once the game was running another shocker the tutorial was not annoying.( now days with way people program then its ment for a 8 year old kids for most video games not this game read tutorial or skip it and your given a high end mage with all the spells sink or swim.

3. once you die you lose every thing till you find the chest for the life insurance gobin. after many deaths ..... even more deaths

---

starting out with undies only I built a mage it was fun.

4. There are not many games I go I have to play it though I have them diablo 3 same genre type of game. this one though is way better than that in that I feel like I'm playing a version morrwind with freedom to mess up it royally where can run in to something a low level can not deal with and good luck trying to run a way or load up next area and be ambushed with none of your spells on fun fun know your hot keys !

5. like morrwind you can make the character in to any thing any hybrid mage tank , dps mage what ever you dream up with spells in the game you can make it truly your own. mine is summoner tank I have these undead and nature beast jump in to the battle with me i then stun enemys with frost wave and slowly beat there heads in with sword and sheald.

to rap it up if you can get it to work dont mind a little dated grafics and you dont have a life because this will suck it up you just forget the time and keep playing this.

Refunded it, only because there's currently no way to disable the annoying special effects and things that just hurt your eyes when you're trying to focus.

Also it's like 80% anime music, and I'm not into that at all, all I want is EDM/dubstep or hell even piano songs are fine, but there are so few.

Sure there might be a bunch of those song types in the DLC pack, but that's more than 20€.

I'd rather play StepMania for free than pay 20€+ for a Steam game.  
Christ. Really fun campaign, really well priced DLC.

Well done with the game developers!. This is some serious stuff 1.5k coins torero cabin and it's likely the most expensive cabin as of today a 5 volley rocket launcher 2 cool corno things that spew out flames a new paint cool stickers and a new profile picture and custom vehicle it's amazing also it gives you some cool parts as well I highly recommend. Save your money.. short time is great for play this game.. I found this game to be overall very enjoyable in short 30-40 minute bursts. The character design is excellent and the music is great and the storyline and dialog is very well written. It's not the sort of game you spend 4 hours a day playing, it leans more to the casual waiting between college classes side of gaming. Highly recommended for anyone who is a fan of youkai (5996602a).. Easy for those who have perfect pitch, but still very fun, since you can learn all the names of scales and chords, and play with tons of different instruments. For the pitch guessing mode I suggest an option with multiple notes played at the same time, with the option to choose between different instruments for each note. The scale guessing mode is fine and the key guessing is very fun, but the last chord/note that is played twice at the end of each algorithm generated song makes the task really easy since it turns it on a simple key guessing mode. It should be removed. Overall the game is very fun and has a lot of value for those who want to test their ears while learning the names of chords, scales and even get inspired with some randomly generated theme you can hear (and maybe have a cool idea for a song?). We need more games like this on Steam (games that test perception). I recommend this one, for musicians or ordinary people who just want to learn more about how music is built.

Ps: I didn't know there was a Blues Scale, but when I first listened to it, I immediately thought: This is blues! a few seconds later, there was the option to select. Really cool :). an amazing game with out stunning animations and game control this game is so amazing that the aliens can walk on each other HOW COOL IS THAT!! the idea of the game is to pick up these boxes and bring them to home but most of the time you will be falling off I would highly encourage anyone out there to pick up this game you won't regret it!. Find another flightsim. Ancient, arcade-y, a giant pixel-fest, and probably not worth it at \$5 let alone \$25. At least, unlike F-22, this doesn't just crash when you enter the settings page. Perhaps because this doesn't support 3D accel at all.... I'm not that much of a gamer but more interested in VR and what the technology has to offer. At a reasonable price Constellation Distantia seemed like the right title to try out what feels like to be a space pilot.

It's clearly a PC game, because the menus and texts are a bit hard to read at times, but most importantly the flying is a lot of fun (it's actually 1st person in VR), and it looks really nice. The graphics are flat, clean and clear.

The game also features a background story with some quite likeable characters and decently written dialogue. The game takes you from mission to mission, but it's easy to just forget it and explore the universe the devs have created. A definite thumbs up for me.
